

Fact Sheet

Report Layout Engine

For converting diagnostic report content into ready to use documents

Automated document layout and editing

- Converts simple lab data as well as more complex report content into ready to use documents (PDF, ODT)
- Layout and editing based on customer-defined templates
- Applicable to every type of content – lab values, text elements, charts, tables, etc.

Flexible template management

- Define and use your own branding, themes, styles and structure for diagnostic reports
- Templates easily manageable within the system – no programming required

Seamless integration

- Easily integrated into your IT infrastructure
- Import of data and content via HL7 or XML
- Usable in combination with GIMS-DRM or as stand-alone reporting tool
